## Product description

The 19" Taycan S winter wheel set for the Porsche Taycan J1 II (facelift from 2024) is an excellent choice for drivers who do not want to compromise on performance and safety during the cold winter months. This set includes rims in two different sizes: 8J x 19 ET50 for the front axle and 10J x 19 ET47 for the rear axle. These dimensions ensure a perfect fit and promote the driving stability of your vehicle. The rims are equipped with high-quality Pirelli P-Zero winter tyres, which have been specially developed for winter conditions. The tyre sizes 225/55 R19 on the front axle and 275/45 R19 on the rear axle not only offer excellent traction but also improved handling on snow and ice. This combination of rims and tyres guarantees optimum performance and increases safety in winter driving conditions.

The OEM number of this set, 9J1073604BB, confirms its authenticity and quality as an original Porsche part. As new, unused and undamaged items, these winter wheels offer reliability and durability. They are specially designed for the Porsche Taycan and optimally support its performance characteristics to ensure a safe and comfortable ride even in the challenging conditions of winter.

This wheel set is ideal for Taycan owners who do not want to compromise on driving pleasure and safety during the cold season. It combines advanced technology with first-class quality and ensures that your Porsche Taycan retains its outstanding driving characteristics even in snow and ice.

## Technical specifications
