Available:	ready for shipping
Price:	3.819,02 € (nett:3.209,26 €)

Product description

This set of winter wheels for the Porsche 911 model 992.1 (pre-facelift) is an excellent choice for drivers who do not want to compromise on performance and safety during the winter months. The set consists of high-quality rims measuring 8.5J x 20 ET53 for the front axle and 11J x 21 ET66 for the rear axle, which were specially designed for the Carrera S. The rims are fitted with new Continental winter tyres, which have a tyre size of 245/35 R20 at the front and 295/30 R21 at the rear. These dimensions guarantee optimum grip and traction on winter roads.

The tyres are from the 2022 production year (DOT/year 2022), which underlines their freshness and performance. In addition, the wheels are equipped with TPMS sensors (tyre pressure monitoring system), which constantly monitor the condition of your tyres and thus provide an additional level of safety.

The OEM number for this wheel set is 992044602B DOT22, which confirms the authenticity and high quality of these original Porsche parts. As new, unused and undamaged items, these winter wheels meet the highest standards set by Porsche.

This wheel set is not only functional but also aesthetically pleasing, giving your Porsche 911 a strong presence on the road, even in bad weather. Ideal for Porsche 911 drivers who do not want to compromise on quality and performance.
