

Evaporation Carbon Charcoal Canister / Retainer

 **TEILE.COM** > Porsche Panamera > 971 > Fuel & exhaust system > 201-20 Carbon canister

Product details

Article number:	971201801P
Condition:	used
Suitable for:	Porsche Panamera > Model 971, 2017-today
Manufacturer price:	575,75 € (nett :483,82 €)
Discount:	50%
Available:	ready for shipping
Price:	287,87 € (nett:241,91 €)

Product description

This Activated Carbon Canister, specifically designed for the Porsche Panamera model 971, is an essential component for reducing emissions and preventing fuel vapor losses. Manufactured as a genuine Porsche Original part, it ensures compatibility and optimal performance for your vehicle. The canister is part of the vehicle's evaporative emissions control system, which captures fuel vapors from the fuel tank and temporarily stores them in the activated carbon within the canister. When the engine runs, these vapors are purged from the carbon and burned in the engine, thus reducing the amount of volatile organic compounds released into the atmosphere. The product is brand new, unused, and undamaged, ensuring that it meets the high-quality standards expected from Porsche. It comes with several OEM (Original Equipment Manufacturer) numbers including PAE201801F, PAE201801, 971201801AD, 971201801P, 9A7201801B, and 9A720180120, which can be used to verify the part's authenticity and compatibility with specific Porsche Panamera 971 models.

This activated carbon canister is an excellent choice for maintaining the environmental efficiency of your vehicle, while also adhering to the stringent emissions regulations. By choosing a genuine Porsche part, you ensure that the fit, function, and longevity of the component are exactly what you would expect from a leading car manufacturer.
