Manufacturer price:	450,01 € (nett :378,16 €)
Discount:	20%
Available:	ready for shipping
Price:	360,01 € (nett:302,53 €)

Product description

Introducing the first ski helmet from Porsche: PORSCHE | Head RADAR 5K PHOTO MIPS. This innovative model combines the advantages of ski goggles and a helmet with a visor, offering users unparalleled comfort and safety. The helmet features a matte, two-tone design and technologically advanced features.

A key feature of the helmet is the integrated photochromic visor, which automatically adapts to changing light conditions, switching between categories S1 and S3. This ensures that the user enjoys optimum visibility regardless of the weather. The visor also provides a wide field of vision and can be easily lifted up, which is particularly useful during breaks. For maximum comfort and a perfect fit, the helmet is equipped with the innovative Sphere Fit system, which is currently patent pending. This system, combined with the magnetic Fidlock buckle, allows for quick and easy donning and doffing of the helmet. In addition, the helmet features perforated PU-leather ear pads and strategically placed, painted ventilation holes for proper air circulation.

Safety is a key aspect of every Porsche helmet, which is why the RADAR 5K PHOTO MIPS model is equipped with the MIPS system. This technology provides additional protection in the event of a fall by allowing the inner part of the helmet to rotate independently of the outer part, minimising the risk of injuries caused by rotational forces.

The helmet is available in sizes M/L (56-59 cm), allowing you to choose the perfect size for most users. The product is new, undamaged and is an original Porsche part, as confirmed by the OEM number: WAP0620020PHK5.

PORSCHE | Head RADAR 5K PHOTO MIPS is the perfect solution for skiers looking for professional equipment that combines style, innovation and the highest safety standards.
